

HOSPITALITY BUILDING RENOVATION

SPORT

Mugello, Italy

Re-qualification of Mugello's track services buildings takes its ideas from the interpretation in abstract terms of the traces left from a tire in movement. This formal reference has been used to cover the entire development of continuous ribbon windows in semi-transparent material, which marks the different levels wrapped in a single articulate volume, with a pace sometimes adjacent and sometimes distant freely projected into space.

MDN Marco Visconti & Partners with: D. Chiaruttini, G. Pairone and M. Palmisano, F. Lanzetti, P. Rizzuto, M. Pol, M. Marrano, C. Bisi
