PROJECT PHASE: Preliminary project

proposed stadium will provide a world class 45,000 seat FIFA compliant venue for the 2018 World Cup to be staged in Russia. With the spectator experience the driving force behind the design approach the lower terrace is situated 7m from the pitch touchline provide an intimate and dynamic match day atmosphere.

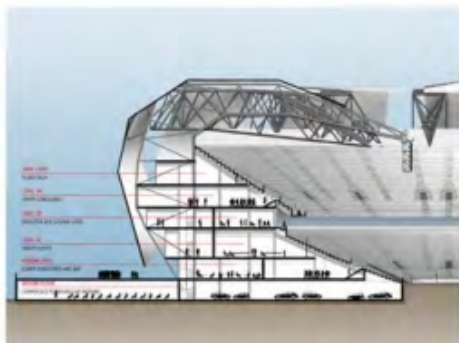

The stadium comprises of a lower terrace with executive seating to the rear separated from the GA spectators through the use of a

The upper terrace overlaps the lower terrace to bring the fans located in the upper terrace as close as possible to the playing field of play. The terraces are designed with excellent comfort factors in mind to provide the ultimate match day experience to its spectators.

At ground floor level the spectators are greeted by a podium elevation providing match-day and non-match day activities. The podium provides the facilities for spectators and the local community such as:

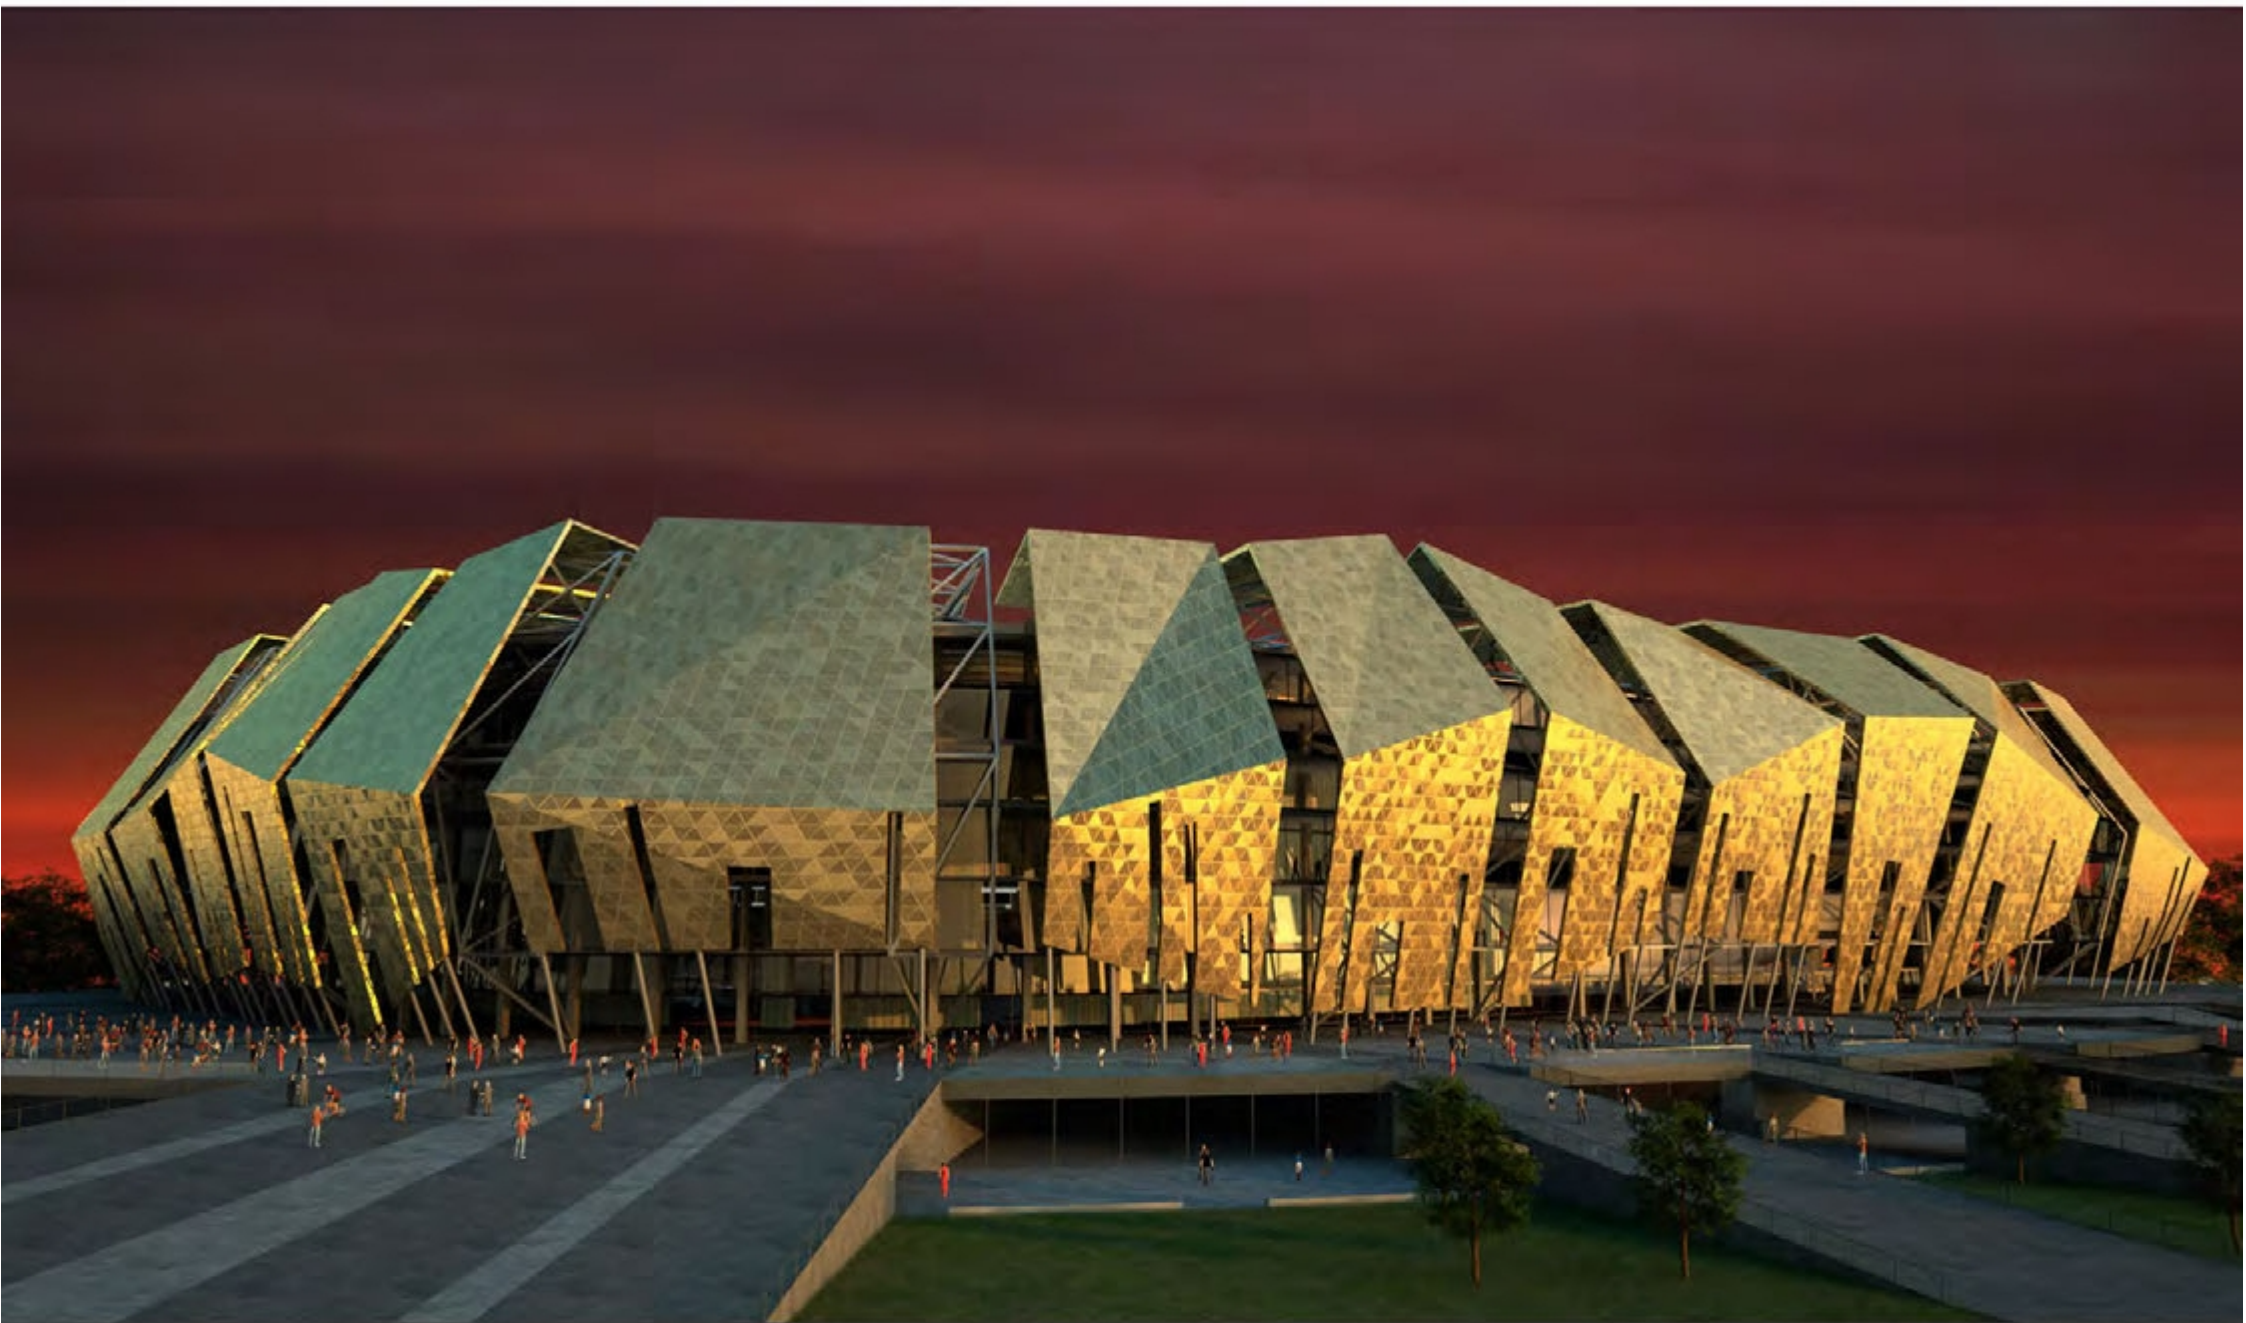

1. Creative media village with studios and break out rooms;
 2. Leisure Center with gymnasium, swimming pool, aerobics and dance center;
 3. Crèche;
 4. Community area for local residents;
 7. Health Center facility;
 8. Educational room;
 9. Restaurant for Match-Day and Non-Match Day use;
 10. Club Museum;
 11. Car parking spaces allocated for 500 VVIP's and VIP's.
- At Level 1 the spectators will find themselves at podium level at which point they may circumnavigate the stadium 360 degrees and enter the

stadium. At level 02 there will be bar and finger buffet dining facilities for hospitality spectators. Level 03 provide hospitality facilities for form of 60 executive box suites each exclusive kitchen, preparation galley and cloak room. Level 04 provides concourse facilities for the Upper Tier the stadium provides an original, intimate and dynamic Architectural statement highlights the importance of the club city.
